

COLOUR CHART AND SURFACE TREATMENT FOR DOORS

STANDARD COLOURS

WHAT COLOUR IS RIGHT FOR YOU?

The colour of the door can change the look of the whole building — we have taken this into account and therefore offer several colours as standard. You will find them above.

EAB offers three types of surface treatment for your folding door:

- Hot-dip galvanised door leaf frame clad in sheet cladding in the basic design.
- A hot dip galvanised door leaf frame with polyester lacquered steel sheet cladding as per the standard range of colours.
- Paint treatment on a hot dip galvanised door leaf frame and steel sheet cladding as per optional colour.

For accurate colour reproduction, steel sheet samples should be consulted.

Built to last.®

EAB Doors include: Folding doors, Thermal doors, Side hung doors, Security doors, Fire doors, Fire windows, Thermal windows, Entrances/Glazed sections, Machine guard doors and Sliding doors.
