

Radioshuttle™ Connect

Connectivity made simple

This is Radioshuttle™ Connect.

Radioshuttle™ Connect enables two-way communication between the shuttle and a device of your choice.

It acts as a merger between the hand-held remote control and the information display of the shuttle.

Send all commands of the remote control. Receive real time information back.

The Radioshuttle™ Connect can be installed in any RS6.0 shuttle. Just plug and play!

Use a device of your choice - the only thing you need is a web browser.

- Simple
- Flexible
- Plug and play
- Two-way communication

WE CONVERT SPACE INTO BUSINESS
