

SLIDING DOORS

EAB's sliding doors are used for machine halls and industry.
They are based on a quality approach and professional knowledge.

Built to last.®

FACTS

Design

EAB's sliding doors are used in machine halls and industry. They are based on a quality approach and professional expertise, from drawing to delivery and installation. Have a look at our in-house developed *Vision*, a fully glazed sliding door that provides maximum light transmission without compromising on safety. Glass has a documented inhibitory effect against collisions as it provides a good view and thus enables a safer passage.

Door leaf

Frame of hot-dip galvanised square tubes. Clad with silver coated EAB profiled sheet.

Glazing

The doors are supplied with a D4-18 insulated pane, which is fitted in heavy-duty strips of naturally anodised aluminium.

Seals

All sealing strips are screwed to the door frame or door surround.

Surface treatment

Option 1: Hot-dip galvanised door leaf frame and silver coated sheet cladding.

Option 2: Hot dip galvanised door leaf frame with polyester lacquered steel sheet cladding as per the separate range of colours.

Option 3: Paint treatment on hot dip galvanised door leaf frame and steel sheet cladding as per the separate range of colours.

Insulation

Intermediate insulation of mineral wool or uninsulated with metal cladding only on the outside.

Fittings

- Carrier rail of C profile mounted in bracket, adjustable bogie-type carriages adapted to the size and weight of the door.
- Control in the lower edge is designed according to the nature of the floor.
- Internal lock pin with eye for padlock, applies to manually operated door.
- The doors can advantageously be fitted with an access door and standard lock Assa 410-50 excluding cylinder. Security pins and safety lock plates are included.

CUSTOMISING

Choose what best suits your premises and do not hesitate to ask us if you need advice and assistance.

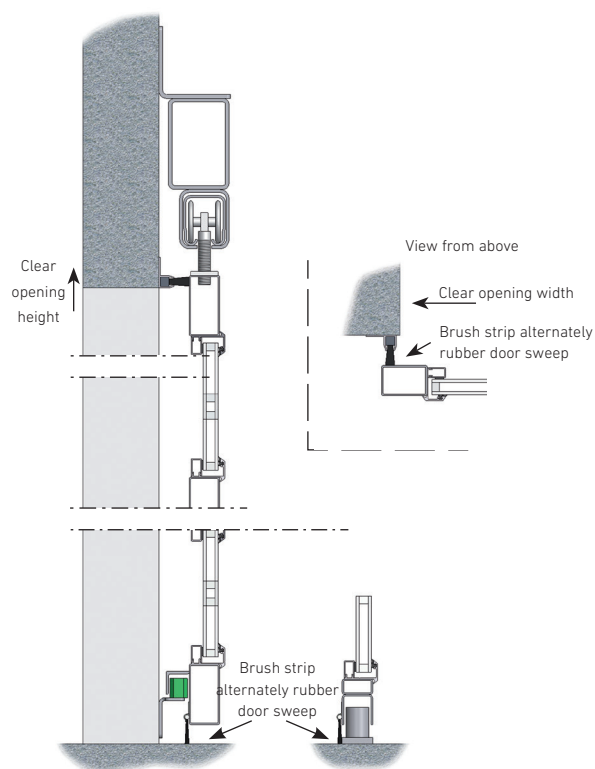

Insulated or non-insulated? Fully glazed or a combination of painted steel and glass? In-house manufacturing means that we offer a wide range of options when it comes to the door design.

LONG DURABILITY

EAB's steel sliding doors, which are also available with an access door, have a consistent high finish and a very sturdy construction. The few moving parts are quiet during operation and require a minimum amount of maintenance. The doors are manufactured as manually operated, single or double leaf.

10 YEAR GUARANTEE

We know that our doors last — and that they keep what we promise. Therefore, a 10-year guarantee is always included regardless of the solution you choose. Each door is manufactured in our own factory in Smålandsstenar.
