Facts

Slide-out unit

EAB's slide-out units are based on a tried and tested design, with safety and function as the highest priorities.

Safety requirements

EAB's slide-out units fulfil the new European Standards SS-EN 15620 and SS-EN 15635.

Surface finish

EAB's slide-out units are finished with a durable powder coating. The standard colour is orange.

Delivery

The slide-out unit is supplied complete with attachment device for installation on supporting beams, or a connecting bar and expansion screws for the floor model. Follow the accompanying installation instructions to simply and quickly install EAB's slide-out unit. When installing a slide-out unit on supporting beams, first check the maximum permitted load for the beams you are using. At the maximum pullout point, the pallet's centre of gravity is beyond the front beam.

EAB built to last.

Durability is a distinguishing characteristic of EAB. Our attention to detail and quality thinking are part of everything we do from selecting material to manufacturing, delivery and assembly. Durability also includes the relationships we have with our customers, suppliers and employees.

- + Wide range of Standard products
- + Five year guarantee
- + Concept, project management, construction and assembly
- + Tried-and-tested products
- + One project leader = a single contact person throughout the project
- + Production and product development at the same site
- + Extensive experience and solid know-how in steel structures (valuable know-how gained in many warehouse equipping projects)
- + Everything in good time. We ask any questions that arise before making our offer to avoid unnecessary extra costs
- + Our own testing department
- + A long-term approach to business and customer relationships
