

# DESIGNLINE

When function meets design, build your door entirely based upon your specific needs and requirements and create something that is absolutely exceptional.

Built to last.®

## DESIGNLINE

EAB Designline is for those who want freedom of choice in their door order. At EAB we create concrete proof every day that a durable and functional door need not be boring. With 60 years' experience in door manufacturing, we know the art of combining design, function and durability.

A very flexible production line, durable materials, knowledgeable employees and our desire to create new products enable us to provide customised door solutions, according to your needs and requirements.

The doors are hot-dip galvanised in their basic version and there are several different surface treatment options available, depending on the environment in which the door is placed. Whether genuinely rustic or classically modern, we offer customised solutions to suit your business.

### STEEL AS A BASE

With steel as a base, the wood comes into its own. With a stable, welded steel frame in the foundation, you get all the benefits of steel, along with the aesthetic potential wood cladding has to offer. Choose between herringbone patterns or classic crosses.

### CHOOSE YOUR COLOUR

A door colour can change the appearance of the entire building. This is an established fact and this is why we have chosen to offer a range of different colours as standard. There are several different surface treatment options to choose from, depending on the type of environment the door will be placed in.

### 10 YEAR GUARANTEE

We know that our doors will last and that they keep our promises. Therefore, a 10-year guarantee is always included regardless of the solution you choose.

Uniform, fully glazed folding doors with access door. Designline version in machine shed.

Classically modern - fully glazed folding door with black painted frame, uniform with the building's facade.

Genuinely rustic - arched, wooden door with a herringbone pattern.

Combine glazed sections and plain plate, 4-sections, inward opening folding door with recessed access door.

Fully glazed folding door for optimum light transmission, with recessed access door.

Genuinely rustic - wooden folding door with classic crosses, one row of glazing for light transmission.

## DESIGN YOUR DOOR

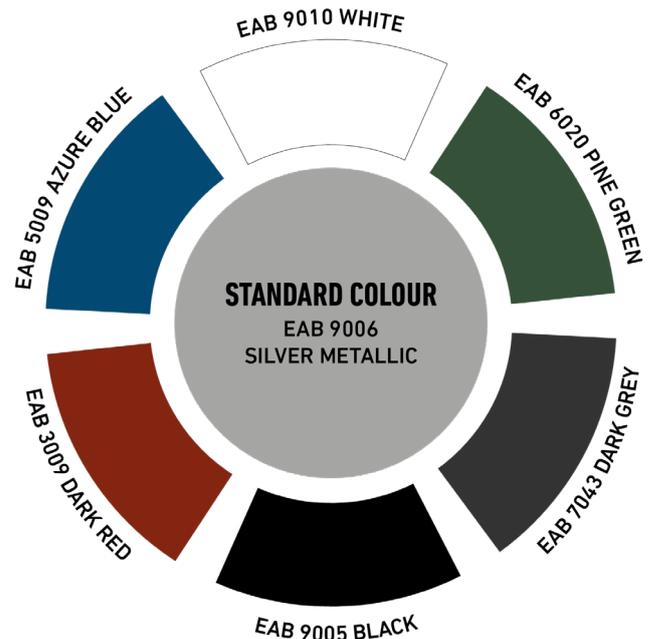

At EAB we create concrete proof every day that a durable and functional door need not boring. With 60 years' experience in door manufacturing, we know the art of combining design, function and durability. The options for customising your door are endless.

Our Designline concept is created for those who are looking for a door that is out of the ordinary, both in terms of function and execution. Design your door and, together with us, create the best door solution for you and your business.

## STANDARD COLOURS

# FACTS

## Standard version

EAB folding doors are manufactured as 2, 3, 4, or 6 sectioned. Choose between inward or outward opening, with manual or automatic opening. If you want automatic opening, we offer a variety of Swedish-made options.

## Door leaf

Door leaf frame and dividers made of hot dip galvanised tubular steel profiles.

## Frame

EAB manufactures and stocks frames in U and L profiles as well as square tubes.

## Insulation

Panels made of insulating glass with a U-value of 1.1 or sheet metal cassettes mounted in natural.

anodised aluminium profiles that give the feeling of a mirrored door. Other types of panels are fitted on request.

The door can also be made with a thermal break in the cold bridge, see brochure Thermoport.

The access door has a matching impact strip made of natural anodised aluminium profiled sheet with EPDM sealing.

## Surface treatment

Option 1: Hot-dip galvanised door leaf frame/dividers. Fillings of silver metallic sheet metal.

Option 2: Hot-dip galvanised door leaf frame/dividers. Fillings of lacquered sheet metal according to standard range of colours.

Option 3: Paint treatment on hot dip galvanised door leaf frame/ dividers and fill in any colour.

## Fittings

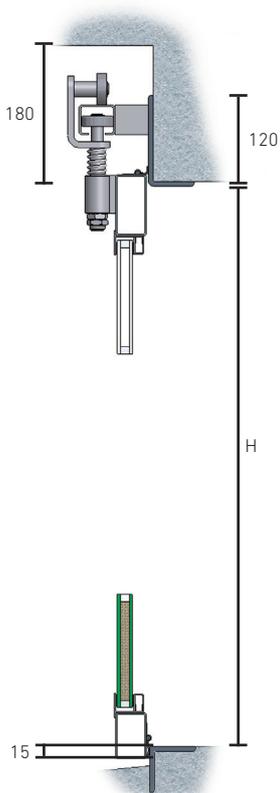

Lubrication-free welded hinges. Ball-bearing guide or carrier fittings running in a heavy duty C-profile. Low profile guide shoe on door centre floor. Heavy duty surface mounted espagnolettes with eyelets for padlocks. Lock in access door Assa 410-50 excluding cylinder. Lever door handle 640 N. Easily replaceable sealing strips.
